Importer & Supplier

With a global network, Miami Stainless is one of the most specialised stainless steel architectural and shade structure hardware suppliers in Australia. We have built strong relationships with our business partners for over a decade that allow us to be involved directly in the manufacturing process of the products we purchase. Together we ensure our high-quality standards are met and use this combined expertise to drive product innovation.

Innovation & Development

Industry Experts

As industry experts we keep up-to-date with the latest news, information and customer feedback allowing us to identify trends and issues. Our product development is based on this research so you can be assured that you have access to the most innovative and in demand products on the market.

Advanced Streamline Balustrade Systems

Miami Stainless supplies some of the most advanced streamline balustrade systems available. We supply pre-welded, pre-drilled and assembled modular posts for easy on-site installation to suit any project.

Testing Facilities

Our testing facilities allow us to monitor quality and provide the most accurate product data. We provide maximum breaking strains for all our load bearing products as well as in-depth information including technical drawings and specifications.

Wire Rope

ProRig® wire rope is sourced from a selected Korean manufacturer to supply you with what we believe is the best wire rope available worldwide. With more than 40 years experience manufacturing wire rope, ProRig's greatest emphasis is on material quality, surface brightness, finish, and a strong desire to make the worlds best product.

Highly skilled staff, state of the art equipment, innovation and strict quality control ensure that the highest possible quality is achieved every time. This has resulted in ProRig® wire rope being tried and tested in thousands of applications around Australia for more than a decade without a single product fault or failure.

- Reliable product manufactured from high quality 316 marine grade stainless steel.
- Ultra smooth and shiny finish for maximum corrosion resistance and aesthetic appeal.
- 1.2mm-16mm available ex-stock in 1 x 19, 7 x 7, 7 x 19 constructions. Up to 32mm available to order.
- 305metre, 1000 metre, & 2000 metre rolls available.
- Range of sizes and colours available ex-stock in PVC coated wire rope.

1 x 19 Construction

Sizes available 1.6mm - 10mm

This wire is non-flexible, ideal for straight runs, with a higher breaking strain due to a smoother surface finish. Can be used for wire balustrades, tension membrane, vinyl shade structures, architectural rigging, green walls/cable trellis, shop fittings, marine applications and general purpose.

7 x 7 Construction

Sizes available 1.2mm - 12mm

This wire is semi-flexible and ideal for bending around corners. Can be used for wire balustrades, shade structures and sails, architectural rigging, green walls/cable trellis and general purpose.

7 x 19 Construction

Sizes available 2.0mm - 12mm

This wire is flexible and ideal for bending around tight curves. Can be used for wire balustrades, shade structures and sails, architectural rigging, green walls/cable trellis and general purpose.

Hardware Range

Stainless steel is the preferred material for hardware used in modern designs. It's resistance to the elements, structural strength and bright aesthetic qualities make stainless steel hardware the perfect choice for your building and construction project.

We supply primarily to the architectural and shade structure industries but the possibilities are endless. Our customers report our products being used in general purpose applications such as suspended shelving, hanging signs and rigging for larger decorations.

Our hardware range has grown over a decade to include the latest innovations, more sizes and customer requests. We strive to cater to our customers requirements by spotting trends in the industry and sourcing products. We are now one of the biggest suppliers of stainless steel hardware with large stock holdings of our most popular products.

Our range includes both AISI 316 and AISI 304 grade stainless steel, the difference is primarily the level of corrosion resistance. Most of our hardware is very high quality marine grade AISI 316 stainless steel sourced from the most respected producers around the globe.

Vertical Gardens

Stainless steel trellis, also known as vertical Garden mesh, green wall garden mesh or green façade, is stainless steel wire in lines or patterns across an existing surface or between uprights such as walls or posts.

Stainless steel trellis can be placed in the same green technology basket as solar panels or wind turbines as they can reduce the 'urban heat island effect' held by urban development materials, which retain heat. The major advantages green walls have over other green technology are its beauty and interior temperature regulation by shading. When applied specifically to vertical structures, green walls create an insulating layer of air between the vegetation and façade evening out temperature changes and noticeably reduces heating and cooling costs.

Vertical gardens are used for decoration, to provide shade, as privacy, space dividers and in some cases for animal enclosures.

Balustrade Systems

Miami Stainless wire balustrade systems are unique, functional, easy to install and provide a stylish and contemporary finish to any project. If you're looking for a low maintenance, durable option to complete a deck, staircase, veranda or fencing need, our systems are your solution.

We carry a large range of popular balustrade systems as well as patented ProRig® systems that are innovative and streamline. These systems are designed to have less visible fittings while retaining strength and durability.

All of our high quality AISI 316 marine grade stainless steel wire balustrade systems are available to suit timber or metal posts, walls or panels. Factory swaged wire balustrade systems are generally produced and shipped within three working days meaning you can measure one week and install the next!

For more information on our balustrade systems and to find which would work best for your next project try our new Balustrade Builder online at miamistainless.com.au.

Custom & Pre-Made Posts

Our in-house post manufacturing facility means custom posts have never been so accessible. With more options and quicker lead times, Miami Stainless ProRail® custom posts are fabricated from high quality AISI 316 marine grade stainless steel in either a matte satin or mirror polish finish. All Miami Stainless ProRail® posts are specifically designed and produced to suit stainless steel wire balustrade systems. Round posts are available with a welded bottom flange, cover plate and a ProRail® top fitting ready to glue in or optional welded top flange. All square and flat bar posts are available with welded top and bottom flanges.

Resources

We know how important it is to have all the information you need available when you need it. We have an extensive and continually growing resource section that provides detailed information on each product. In our downloads section you can find helpful videos showing everything from installation processes to product showcases. You will also find technical files that give accurate product details as well as testing certificates showing maximum loads. We are experts in the industry who keep up-to-date with the latest news and regulations that we pass on to you. We send regular newsletters to our list of subscribers containing information on all topics relating to the industry to keep you informed.

ProRig & ProRail Brand

ProRig®

Miami Stainless stocks and sells the full range of high quality ProRig stainless steel hardware, wire balustrade and wire rope products. ProRig products have been sold in Australia for more than a decade although the ProRig brand name was only officially launched in 2007. The brand was originally introduced as a means of differentiating the high quality ProRig stainless steel hardware and wire rope products we sell from cheaper and lower quality products flooding the market. The ProRig brand name has become synonymous with the supply of innovative, high quality, tried and tested stainless steel products.

ProRail®

The ProRail range of high quality stainless steel modular handrail, and post products have been specially designed to be used in conjunction with ProRig wire balustrade systems and ProRail glass clamps. The ProRail range offers a simple and stylish modular handrail system adaptable to suit almost any situation. Sourced from a single manufacturer and made from quality materials, all fittings are expertly finished in either a satin matte finish or a mirror polish finish. All fittings are required to pass through stringent quality control procedures before they leave ProRail factory ensuring we are able to supply you with a consistently high quality product.

Customer Service & Testimonials

Our focus is always the customer and understanding how we can help improve their experience with us. We are proud to have an experienced customer service team that provide phone support Monday to Saturday. Our expert team are always ready to assist with your design questions, product selection and technical support and our purposefully designed communication tools allow you to search, design, learn about and buy in your own time. We have supplied thousands of stainless steel solutions across the globe giving you direct access to unequalled expertise and innovation.

We found that the majority of our new customers are recommended to us by their friends, co-workers or family who already use Miami Stainless. This is the best compliment we can receive and enjoy getting feedback from our customers. Here are a few of their testimonials:

"Thanks for all your help, excellent service and great product. The project went really well, fitted together perfectly and the total cost came well under my expectations." Mike, Queenscliff, Vic

"You guys are a pleasure to deal with and I am glad to have you as part of the team that allows me to do what I do with confidence and pride." - Rob, Perth, WA

"Thanks very much for the extremely fast service! This means a lot especially when I'm ordering last minute!!"
- Geoff, Tallebudgera, Qld

"I wanted to especially thank you guys for your outstanding service. Since I started my business on the Gold Coast 5 months ago, I have experienced consistently terrible service from many other Queensland businesses, from unreturned emails and phone calls, to incorrectly supplied goods, late deliveries and incorrect invoices. Miami Stainless, though, has shone like a beacon of light in an otherwise dim business-to-business landscape. Keep up the good work!" - Gavin, Robina, Qld

"I received my order on Friday and was very happy with your product and your help and service . I found it easy to install and it looks great. Thanks for your help and quick service I would gladly recommend your product to anyone." - Cameron, Launching Place, Vic
